DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, 2, 1, 2, 5, 5, 6 and 6, respectively of U.S. Patent No. 6702388 in view of Stewart. The aforementioned claims of patent no 6702388 teach a ball chair with a retaining device at the front edge of the seat frame and a backrest at the rear edge of the seat frame instead of another retaining device. The patent to Stewart (Figs. 6-8) teaches two curved wall retaining devices 70, 72 for retaining a ball on a support to be conventional in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the backrest with an additional retaining device since the backrest acts as a retaining device.

Conclusion

Art Unit: 3636

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Strom, Phillips, Ekman et al (389), Strong et al, Guery-Strahm, Raymond, Ekman et al (070), Francavilla, Jospa et al, Chiu (371), Dillard, Liao, Hsu and Ballendat all teach devices similar to that of the instant invention.
